## RIDGEDALE

Mr. D. Miller leaves this week to resume his work at Kamloops. He is convalescing from an appendicitis operation.

Mrs. Topham has returned after spending the winter in Kamloops.

Mr. and Mrs. A. McDougall leave this week, sailing from Montreal on May 21 for Glasgow to spend the summer at their former home in Scotland.

Monthly meeting of the W.A. to Ridgedale Community Club was held at the home of Mrs. P. Beharrell, with the president Mrs. H. Borg in the chair. A feature of the afternoon was a handkerchief shower in honor of Mrs. McDougall previous to her leaving for Scotland. Contest winners were Mrs. John Reid and Mrs. George Beharrell.

Mrs. C. Kelleher and Miss Irene Kelleher extended an invitation to the Club to meet with them at their home on Sumas Mt. Mr. P. H. Sheffield will be the speaker.

Mr. and Mrs. Percy Smith spent the week-end with friends in Washington.

Mrs. H. J. Hill-Tout and infant son have returned from the hospital.

## MATSQUI

Mrs. Percy Smith spent the week-end visiting relatives at Mt. Vernon. Danny Neeley, who has been their guest the past month, returned to his home with them.

Mrs. Mundy was hostess at a bon-voyage tea on Tuesday in honor of Mrs. D. MacDougall, who is leaving on Friday with Mr. MacDougall for an extended visit with relatives in Scotland.

Mr. Ebert Rust spent the week-end at guest of his aunt, Miss Emma Rust, at Bow, Wash.

A number of friends surprised Mrs. Johnstone on Saturday afternoon, the occasion of her birthday anniversary.

Miss Jessie Duncan spent the week-end as guest of Mrs. Joe Smith.

Mr. Cyril White has bought a new car.

Mrs. J. Black and Mrs. D. Rennie spent a few days in Vancouver recently as the guests of Mr. and Mrs. Manzer.

Word has been received here of the death last week in Victoria of Mrs. Russell. Mrs. Russell resided with Mr. Sleeman and the late Mrs. Sleeman on the Olsen farm on Glenmore road before moving to Victoria.

Mr. and Mrs. J. Little entertained a few friends at lunch on Sunday.

E. Ellingsen has secured a job at a lumber camp near Steelhead.

W. Munday has found employment at Mission.

The Baptist Ladies' Aid will meet at the home of Mrs. Frank Sandberg on May 21st.

Mrs. E. Nanthrup, wife of Rev. E. L. Nanthrup of Vancouver, and former pastor of the United church in Matsqui, is visiting at the home of Mrs. Bakken for a few days.

Mr. and Mrs. Reed and family of Powell River have taken up residence in the Anderson place at the junction of the Riverside and Township roads.

Matsqui elementary school meet is to be held on Friday, May 22 on the school grounds, when medals will be awarded for the highest aggregate points. Parents invited to attend. (Other items arrived too late)

Matsqui high school athletes came third in the track meet of Fraser Valley high schools, held Saturday at Mission. Pupils of Mission school took first place and Chilliwack second. Individual championships were won by two Matsqui boys, Donald Norris, junior; Cecil Ayling, intermediate.

Abbotsford athletes placing in the meet were: Dorothy Duark, first in jr. girls 75 yd. dash and 100-yd. dash. Dorothy set a record time in the first event, of 9 4-5 sec. Mina Cooper, 3rd, in junior broad jump; Kay Webster, 2nd in softball throw jr. and 3rd in hop-step and jump, open; in the junior girls' relay, the Abbotsford team, composed of Dorothy Duark, Fay Stewart, Naomi Bailey and Kay Webster, came second. Glenn Fadden won first place in the junior pole vault, setting a record at 8 ft. 9 in. George Knox came second in this event; H. Buker came second in the high jump; Fred Wahlman second in the shot put and Bill Waterston third in the broad jump senior.

## The Rocky Mountains Call

Two of the most democratic societies in the world, whose membership includes a former king and queen, famous statesmen, and common folks, all on an equal footing, are the Sky-Line Trail Hikers and Trail Riders of the Canadian Rockies, whose annual outings this year promise something new in the way of scenery and energetic healthy recreation.

The Trail Riders, whose five-day trip starts from the Banff Springs Hotel on July 31, will tour a section of the Park which was chosen by Major P. J. Jennings, superintendent of Banff National Park, for the interesting variety it offers. The centre of activities for the Sky-Line Trail Hikers, from August 7 to 10, will

be Lake O'Hara, probably the most beautiful spot in the Rockies. In both cases there is splendid fishing in swift-running mountain streams, and unlimited opportunities for the camera enthusiast.

The Trail Ride actually begins about four miles from Banff, winds its way between Mount Edith and Mount Norquay, follows Fortymile Creek east of the Sawback Range, passes over Badger Pass, follows Johnston Creek down to the end of the spectacular canyon of the same name, and ends up near the highway where there is an ideal spot for the Pow Wow and Sing-Song that concludes every Trail Ride outing. It provides five care-free

days with fine open Alpine meadows, high passes, good timber, and lakes and streams of great beauty.

Plans for the Sky-Line Trail Hike make provision for one central camp at Lake O'Hara. This will avoid changing camp every night as has been done in the past and will reduce the cost of the outing considerably. From Lake O'Hara the hikers will make forays of adventure over the Ross Lake trail to Lake Louise; through the Naros Lake district; along spectacular Cataract Creek to the limpid beauty of Lake McArthur and along the McArthur creek trail; and southeast through the valleys of lofty Mounts Yukness, Hunabee, and Wenchemna.

## FORMER SUMAS COUNCILLOR

## SUCCUMBS TO LONG ILLNESS

James Frith passed away at his home, McKenzie road, on Sunday evening, at the age of 71 years 9 months. He had suffered for two years with a lingering illness, and the end was not unexpected.

The late Mr. Frith was well and favorably known for his public work. He sat in Sumas municipal council for 12 years as councillor for ward one, was an officer of Upper Sumas Game Protective Association, an officer of Abbotsford & District Board of Trade, of Sumas Agricultural Association and the former Sumas Co-operative Association. He was also president of the Abbotsford Fruit Growers' Association during its period of useful activity ten years ago, and represented Sumas Council upon the M.S.A. Hospital Board.

The late Mr. Frith had resided upon his berry ranch, McKenzie road, for 24 years, building a comfortable home upon a hill commanding a view of the Sumas district he so loved. He came to B.C. from California, having been engaged in a blasting powder factory in the Bay region for ten years. He had also homesteaded in the early days upon the prairies and resided over a period of 12 years at Brandon and Lethbridge.

Mr. Frith was born in Drayton, Nottinghamshire, England. It was there that he met Mrs. Frith as a youth, and the boy-and-girl courtship became a lifetime of happy wedlock, enduring for more than 50 years, and through the recent period of solicitous care of Mr. Frith to the end.

"Jim" as he was regardfully known, was always to be found with the vanguard of useful community movements. Fond of hunting and fishing in his day, he yet gave generously of his spare time to matters of public welfare. A good husband and father, he was also sterling in his neighborly relationships, as the hundreds of citizens who knew him can attest.

Sharing with his mother the bereavement is one son, Edward Frith, in Lynden, Wash., and two granddaughters.

Funeral service will be conducted this afternoon by Rev. R. Moses, pastor of Trinity United Church. Interment is to be made at Lynden.

Fallbearers chosen are: Harry Day, D. Buchanan, C. A. Lamson, Ferd. Matthews, Wm. Fraser and E. B. McPhail.

## SUMAS DISTRICT

Mrs. M. Anderson, Mrs. Cameron and Mrs. Waterston convened a special meeting of the May Festival committee yesterday, and made further plans for the 24th annual celebration to be held in Abbotsford on May 25. Several original attractions are expected.

Mr. and Mrs. Finlay North visited Mr. and Mrs. P. Reimer on Sunday.

Mennonites of this district have had in operation for the past year a health insurance scheme fashioned upon features similar to a plan in on similar plans operative in sections of Alberta. For an annual fee regular medical examinations are given with treatment if necessary.

The dance held by Whatcom road school teachers on Thursday evening was fairly well attended.

Next time Lee Combs goes to the police for a driver's license, he will wait in the office until he gets it. Picked up in New Westminster last week while driving his truck, he told the magistrate he applied for a license, but was told to come back in two weeks because the officer was too busy at the moment. The magistrate was sorry about that, but the fine would be five dollars.

## The Queen Mary

Disappointment is probably in store for millions in the British Empire who have conceived the impression that the first trip of the Cunard-White Star's super-liner, the Queen Mary, scheduled for May 27, is a world sporting event of the first magnitude with the blue ribbon of the Atlantic for speed as the stakes.

The speed record for the Atlantic was held for the British for 22 years by the Cunard Steamship Company's Mauretania until August, 1929, when the title passed to the Rex, flying the flag of Italy, and has not since been recovered by any vessel carrying the Union Jack.

Millions have been led to believe that the Queen Mary is expected to win back the speed supremacy of the North Atlantic for Great Britain and as a result of the great amount of publicity given to this vessel during the course of her construction and on the occasion of her launching at Clydebank a few weeks ago they confidently anticipate that this consummation is to be achieved by the new boat, but this, according to the London Times, is not the purpose of the construction of this great steamship.

On the contrary, the Times shatters this and other misconceptions of the purpose and mission of the Queen Mary. Not only was she not built to wrest the speed supremacy of the North Atlantic from another country but, we are told, she was not designed to be the most luxurious liner afloat, despite reams of descriptive material which has been published emphasizing the lavish nature of her appointments and equipment.

"The problem," says the Times, "was not to build a ship so big and so fast as to 'stagger creation'. The problem all along was to build 'the smallest and slowest ship that could form one half of a weekly service'."

Continuing the Times says: "Speed is very expensive; and a ship must be big to pay for it. On the other hand size is also expensive; and there is need for nice calculation. The Queen Mary is not meant to be the biggest and fastest ship afloat. She is not meant to be a 'luxury' ship at all. It has been made perfectly clear that the luxury will be there for those who seek it; but one advantage of great size in a ship is that room can be made for all sorts of people, and the Queen Mary is not for the rich only."

However, if the Queen Mary is not designed to be the largest ship afloat or the fastest boat on the seven seas or even the most luxurious, she has claims to distinction which make her an impressive monument to the brains responsible for her creation, exemplified in the words stability, strength and safety and these attributes have been achieved without undue sacrifice of size, speed and lavishness.

On the contrary, the Queen Mary is of noble proportions and embodies the last word in naval architecture, marine engineering and scientific research.

Every conceivable device has been adopted to justify the claim made for the Queen Mary that she is the safest ship afloat and that passengers aboard her will be safer than in their own homes. To quote a recent issue of Pearson's Weekly she is "so well equipped with scientific instruments that it will be literally possible, with a little adjustment, to send her from Southampton to New York without a man aboard," and, "she will be able to steam through impenetrable fog at 40 miles per hour, automatically steered and protected from collision with ships and objects."

These devices include a "radio searchlight" with which the Normandie is also fitted, a continuous beam of ultra-short radio waves which sweep the horizon ahead of the bows of the advancing vessel and record obstructions on a sensitive receiver.

Another is the infra-red ray detector to locate other vessels or icebergs at a great distance in dense fog or black night. "The latest detector of this kind," says the writer in Pearson's Weekly, "is so sensitive to changes in heat waves that it can detect a man through a mile of heavy fog by the heat of his body."

The boat is equipped with an automatic helmsman, consisting of a gyro, electrically connected with the steering gear in such fashion that if the vessel defects one half degree from the set course it will automatically be swung back on the true course. An "echo sounder" will guard the vessel against striking a submerged wreck or iceberg growlers, which hardly show above the surface.

The Queen Mary is practically fireproof. Each cabin is safeguarded by a thermostatic alarm which automatically sets water sprinklers in action when the temperature rises above a certain level and the "electric eye" will be used to detect fire in the holds. At the slightest trace of smoke the electric eye will sound the alarm and release a stream of carbon dioxide gas, automatically selecting the burning hold and smothering the blaze.

Cockney woman (charged with assaulting her husband): "I asked 'im if 'e loved me, an' 'e was so long thinkin' about it that I 'it 'im with a mop."

The air beacon on top of the George Washington bridge tower in New York is visible for 60 miles.

## RELIEF FROM ECZEMA

A lady writes: I had Eczema break out on my leg and tried almost everything, but it did no good. Then I tried Mecca and got relief from the smearing, itching, I cannot speak too highly of Mecca.

**"MECCA" OINTMENT**

## The Retort Courteous

A young man was escorting his latest young lady out of the theatre. Anxious to make a good impression on her, he held his hat in his hand, carrying it carefully upright to keep it from being crushed.

One of the corner wags, who was watching the outflow, spotted the hat and seized on the chance to be waggish. "Hey," he shouted, "are you going to take up a collection?"

The young man looked around a second before he realized that he was the one addressed. "Why, no," he answered softly, "not if you and your organ grinder were here first."

## New Uniform Calendar Plan

Provides International Holiday And Five Business Holidays Yearly

With a suggestion that it be put into effect on January 1, 1938, Rev. Father Jacob Wilhelm of Regina has drafted a reform calendar which provides for the days of the week always falling on the same dates of each month.

Under Father Wilhelm's plan the four quarters of the year are equal with 31 days for the first month of each quarter and 30 days each for the other two months except that 31 days are provided for December to give a total of 365 for the year. An extra day is wedged in between June 30 and July 1 every fourth year to be known as "leap day."

The year will start with January 1 labelled as "international holiday" and January 2 is to be a Sunday with December 31 a Saturday. If the calendar were adopted Good Friday would always fall on April 7 and Easter Monday on April 9.

It is suggested that Saturdays falling on January 1, April 1, July 1 and October 1 be made business holidays, giving with international day on January 1, five business holidays each year. The first four, according to Rev. Father Wilhelm, would be known as rest days when "everyone should carry out a review of his debts or profits."

The calendar is designed to offset objections of the Christian churches to the recently announced plan to provide for a year of 13 months containing 28 days each.

## Patient Revived

Apparently Dead For Some Minutes Is Resuscitated On Operating Table

Another case of a patient who "died" on the operating table, only to be brought back to life again by heart massage and injections of adrenaline, is described in the current issue of the British Medical Journal.

The patient, Ernest Hinsley, about 45, of Waterloo, Ashton, is now normal again, but has no memory of having been to the operating theatre.

His heart, said Dr. J. V. Fiddian, stopped without warning and Hinsley ceased to breathe. Efforts at resuscitation began immediately and the "usual two or three minutes were wasted in fruitless artificial respiration."

Dr. Fiddian then resorted to cardiac massage, and continued this for two minutes without feeling any spontaneous movement of the heart. He then injected intra-cardiac adrenaline into the ventricle.

"The effect," he writes, "was immediate and almost magical. With each squeeze that followed the heart was felt to be enlarging and suddenly it began to beat wildly."

"It was several minutes more before spontaneous respiration was established, but after that there was no further immediate anxiety."

"The patient was returned to bed with his heart still beating tumultuously, in a manner strongly suggestive of an overdose of adrenaline."

## Was Not Photographed

Smallest Book Printed With Ink From Copper Plates

The world's smallest book, which is a quarter of an inch long, three-sixteenths wide, and weighs a grain and a quarter, is for sale in London. The most surprising thing about the text—which is E. F. Thompson's rendering of selected verses of the Rubaiyat—is that it is properly printed from minute copper plates, with ink, on paper, and not merely produced by photograph. The pages are stitched by hand and bound in leather. The verses look like small dark stains on the paper, and can be read only with a magnifying glass. When the book was being printed in Worcester, Massachusetts, in 1932 it was found that the vibration of a passing motor-car was enough to blur the type.

## Distribution of Jews

A total world Jewish population of 16,240,000, of whom 5,000,000, or 30 per cent., live in the Americas was reported by the Jewish Scientific Institute. The survey shows the figure had increased 1,300,000 in the last 10 years. More than 10,000,000 Jews, or two-thirds, live in three countries. The United States has 4,450,000, Poland has 3,150,000 and Soviet Russia, 3,080,000.

Flyers usually find it necessary to use their oxygen apparatus when they reach an altitude of about 18,000 feet.

Argentina is estimated to contain 200,000 square miles of valuable forests.

## WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of fluid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks pink.

A more bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of a camel but have no camel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else, 25c.

## Overcomes Difficulties

Youth Born Deaf And Dumb Learns To Talk And Graduates From University

Born deaf and dumb 23 years ago, Hillis Arnold, University of Minnesota graduate, has accomplished two objectives—speech and completion of a three-year mural painting project.

The youth's mother, Mrs. A. L. Arnold, said she taught Hillis lip reading. She patiently enunciated words slowly. Hillis repeated them by watching how she formed the syllables with her lips. Unable to hear, he was unable to control his tone.

His mother with her hands, indicated when he was speaking too loudly or too softly. To-day he speaks in a clearly understandable moderate tone.

The youth entered the university engineering school in 1931. In his senior year he began an art project, a series of murals depicting the work of various engineering professions. To-day the job—100 feet of murals, five feet high—was completed and he was free to devote his time to another job, as instructor in the Minneapolis Institute of Art.

## Building Flying Boats

Imperial Airways To Operate A World-Wide Service

More than 1,000 skilled men are engaged at Rochester, England, in building a fleet of 29 giant flying-boats for operation by Imperial Airways on world-wide services—including the Atlantic.

There are two decks to the new flying boats, lower being for passenger accommodation and the top for crew (two pilots, two stewards, and a purser), mails and baggage.

The gross weight of the new ships will be 17½ tons, and they will be powered by four 740-h.p. engines, giving a maximum speed of nearly 200 m.p.h. and a cruising speed of 155 m.p.h. Underneath the pilots' cabin is a comfortable smoking room, and there are two more cabins more than eight feet high with adjustable lounge chairs.

There is daytime accommodation for 24 passengers and for 16 sleeping in bunks by night.

## SELECTED RECIPES

### CHERRY ROLL

Temperature: 425 degrees F. Time: 25 minutes.  
½ cup "Crown Brand" Corn Syrup  
1 pint jar cherries (canned)  
½ cup sugar  
1 teaspoon cinnamon  
1 cup boiling water  
1 tablespoon butter  
Tea biscuit batter  
Drain cherries and pour juice in a saucepan. Add the water, sugar and "Crown Brand" Corn Syrup. Boil 5 minutes. While the syrup is boiling make an ordinary tea biscuit batter and roll it out in oblong roll. Spread the cherries over the dough; sprinkle with cinnamon, dot with butter and roll up like jelly roll. Place the roll in an oblong pan; pour the hot syrup over it and bake in a hot oven.

A limburger-cheese-sniffing contest was held in Monroe, Wis., in 1935.

## Issuing New Coinage

Canada Could Improve On Design When Making Change

With the coronation of King Edward VIII, Canada, in common with the rest of the Empire, will issue a new coinage. Would not the present, while we still have a year or so, be a good opportunity for the Government to call together a body of artists and experts to submit designs for coins that would be a little more representative of Canadian artistic accomplishment than the exceedingly unattractive ones which, year after year, generation after generation, reign after reign, come from the mint with such deadly monotony?

Tradition declares that upon each accession the effigy of the new Sovereign upon the obverse side of the coin shall be reversed. When we have done that we in Canada are apparently content to allow the funeral wreath of maple leaves on the reverse side—which on a slightly worn coin much more closely resemble those of the cabbage—and the rather sprawling legend within it to continue to "symbolize" Canada. The comparatively new Canadian nickel is one of the ugliest coins in circulation anywhere.

Other countries are paying increasing attention to the attractiveness of their coins from an aesthetic point of view. Some of the newer United States specimens are things of real artistic beauty, indicative of the country's progress in the arts of sculptural design and modelling. There are surely competent artists in the Dominion who would welcome an invitation to compete for designs for coins of different values, and out of such competition there might come a coinage of which, from an artistic point of view, Canada could be legitimately proud. — Montreal Star.

## London's First Film Show

Moving Pictures Taken Forty Years Ago Again Screened

London's first film show—40 years ago—came to life again recently at the Polytechnic Cinema to celebrate the 40th anniversary of the introduction of moving pictures to the country. The original projector used by M. Lumiere, the French pioneer, was used.

One gathered something of the thrill for an audience of that time of the spectacle of Trewey on the screen giving his changing hat performance and of Louis Lumiere's brother having tea on the lawn with his wife and baby.

When, subsequently, the pictures were thrown by up-to-date apparatus on to a large screen, one realized how good the photography was in the circumstances.

The changing of the guard at St. James' Palace, children playing in the surf, the falling of a wall, a charge of the French Carabiniers, were some of the relics shown.

There was, too, a deliciously quaint "comic", indicating the popular suspicion of the motor car. — Other interesting features, showing how the newsreel was advancing, were the animated records of the funerals of Queen Victoria and King Edward VII., taken by Cecil Hepworth.

He recalled his concern, at Queen Victoria's funeral, when he found that the noise of his home-made camera was disturbing the silence of that occasion and how King Edward, looking round, halted the procession so that the picture might be taken.

Professor (to unruly freshman)—"Tell me sir, what has become of your ethics?"

Freshman—"Oh, sir, I traded it in long ago for a Hudson."

Seedless watermelons have been grown in horticultural experiments.

# Find Out

From Your Doctor if the "Pain" Remedy You Take Is Safe.

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

**Demand and Get "ASPIRIN"**

## Something New In Pictures

Three Dimensional Animated Cartoons To Be Shown

Three dimensional animated cartoons which can be shown with regular movie projection equipment and without use of any gadget by audiences were announced by Max Fleischer, pioneer in the animated cartoon field.

Fleischer declares his invention has passed the experimental stage, and that full length animated cartoons using the third dimension throughout will be released within six months.

Fleischer obtains the third dimensional effect by foreshortening the perspective of the camera to six feet and using a special lens which does not focus directly on the objects photographed.

## Floods And Sun Spots

Are Closely Connected Is Opinion Of Planetarium Director

Floods that have swept the eastern part of North America during the past few weeks are "definitely correlated" with sun spots "and we may expect damp, rainy weather for the next four or five years because these spots are fast reaching a maximum intensity," Dr. Clyde Fisher, director of the Hayden planetarium and fellow of the Royal Astronomical Society, said in a lecture at Providence, Rhode Island.

## Society Of Canadian Writers

Formation of a society of Canadian writers similar to the French Academy, has been undertaken with the issue of letters patent for this purpose by Hon. E. L. Patenaude, K.C., lieutenant-governor of Quebec, to Rev. Olivier Maurault, rector of L'Université de Montreal, Jean Bruchesi, noted French-Canadian author and professor at l'universite, and Albert Levesque, Montreal publisher.

# Trees Recommended As Suitable For Western Climatic Conditions

Climatic conditions generally are not favourable to tree-growth on the Canadian prairies, particularly in the semi-arid area. The prairie tree-planter has to contend not only with these unfavourable conditions but also with competition from the natural groundcover. Experience has shown, however, says Norman M. Ross, superintendent of the Dominion Forest Nursery Station at Indian Head, Saskatchewan, and Chief of the Dominion Tree-Planting Division, that even in the driest areas trees suitable for shelter-belts, and also for the production of fuel and fence posts, can be grown if proper methods are adopted.

First of all, the soil must be thoroughly prepared in order to eradicate completely the native grasses and other perennials, and to store up a reserve of moisture to give the young plantation a reasonable start. This usually requires two seasons. In the first season the sod is broken a few inches deep and then thoroughly worked. One season is sufficient to kill all the native plants. The following year, the land to be planted is deeply summer-fallowed to open up the soil for the roots and to conserve moisture.

The next step is to select varieties that have proved hardy and capable of withstanding drought when once established. The list of varieties suitable for shelterbelts, and for propagating in large numbers at reasonable expense, is very limited. It consists of: Caragana (Caragana arborescens), a leguminous shrub of Russian origin, exceptionally hardy and drought-resistant, with a dense shrubby growth to a height of about 20 feet; Manitoba Maple (Negundo aceroides), a native tree with a somewhat bushy tendency growing to a height of about 40 feet; Green Ash (Fraxinus lanceolata), a native, rather slow growing tree, also very drought-resistant; the American Elm (Ulmus Americana), a hardy native tree; White Spruce (Picea alba), native; Colorado Spruce (Picea pungens); and Scotch Pine (Pinus sylvestris) of which there are many types, the one most suitable being propagated from seed secured in Finland or central Sweden.

All these varieties can be grown successfully on the average upland prairie soils. In certain districts, usually associated with lighter soils, the water-table may be reasonably close to the surface (from seven to 15 feet) and in these districts many varieties of poplars and willows, in addition to the trees already mentioned, prove very satisfactory.

## A Beneficial Exercise

### Walking Down Stairs Is Good For Weak Heart

New York City's recent elevator strike probably will take a serious toll for the next six months in hearts damaged by stair-climbing, Dr. J. O. Gieger, San Francisco Health Director, predicted.

Gieger advocates walking down stairs—but not upstairs—as an ideal exercise for persons with cardiac ailments.

Downstairs walking—two or three flights—is beneficial, Gieger said, because even persons with heart trouble require at least some exercise of the muscles and because this form of activity permits it with a minimum of strain on the circulatory system.

## Restitution Money

### Department Of National Revenue Receives Remittance From Ireland

Conscience money keeps trickling into the department of national revenue from odd places in Canada, but rarely does any come from other country. Hon. J. L. Isley, head of the department, has announced receipt of approximately \$25 from Dublin, Ireland.

It was marked simply "restitution" and came in an envelope postmarked March 30. The money consisted of \$20 in Canadian bills and a Bank of England one-pound note.

## An Unusual Job

Over a period of nine years, Judd Budd-Jack of Toledo, Ohio, has cut the profiles of 1,200,000 Americans. With scissors and paper as tools, he requires only 30 seconds for each silhouette. He goes around the country "snipping" for a living.

In 1934 Canada produced 30,175 electric refrigerators, as compared 16,649 in 1933. During the same year she imported 1,755 from the United States.

## Rideau Hall Staff Busy

### Use Spare Time To Help Lady Tweedsmuir's Relief Work

Seven maids have been busy, not only with mops but knitting needles. The seven house-maids at Government House at Ottawa made a knitted patchwork bed-covering and presented it to Lady Tweedsmuir to send with the work from her sewing circle to the destitute areas in the West.

Nellie, Lily, Ruby, Winnie, Louise and Maud, joint workers on the famous quilt, arrived in Canada as part of the vice-regal household. They had been with Their Excellencies some time. Edna, who joined the staff in Ottawa, can tell them all about the need for comforts in outlying Canadian towns.

Down below the white marble staircase in Rideau Hall, more needles have been clicking and flashing. Mrs. Jackson, first lady of the kitchens, has been occupied not only in cooking, but also in knitting a boy's jersey. Little Scottish Annie, Her Excellency's personal maid, has made several pairs of serviceable socks that have found their way into the practical boxes for which the chateraine of Government House is receiving thanks from tiny frontier towns.

One letter of thanks mentions a small boy who had just received his first pair of completely whole breeches with real braces and was parading around to impress the neighborhood. "Little Doreen," who arrived in a household unable to provide her with clothes, is now wearing those made by the sewing circle.

## One Law For Everybody

### Using Influence To Fix Things Not Done In England

It is an axiom that the law is the same for Duke or costermonger in the British Isles, but Albert G. Partridge, (American-born) President of the Goodyear Tire Company, did not quite believe it when he went to England seven years ago. The law is that an owner taking a dog into the United Kingdom, must leave him in quarantine for six months. Mr. Partridge was told by an American friend, that as far as he was concerned, it could be easily "fixed." Such little things usually are in America!

So, as Mr. Partridge told the story at the Empire Club, he left his dog in quarantine and a few days later went to get him out by the usual method of "fix." But before he presented his case, he found that an Uncle of His Majesty, the King, had two dogs confined in the same quarantine. That was enough and it was the initial experience of Mr. Partridge with British law and regulations. His dog remained right where it was for six full months.

## A Very Old Industry

### Rush-Mat Making Was Once Good Business In England

A tiny wooden hut workshop in a cottage garden at Pavenham, near Bedford, England, is the last relic of an industry that once employed the whole village. Soon even that will be closed for lack of work, and 70-year-old George Purser will retire on his old-age pension. George Purser is the last of the rush-matting makers at Pavenham.

For three hundred years without a break his family gathered rushes from the River Ouse, plaited them, and made them into horse collars, baskets, chair seats, hassocks, and floor covering. His father employed 12 men and 70 women.

"Now nobody wants rush-matting," Mr. Purser said. "A firm I used to work for used to make 2,000 horse collars a week. Now I doubt if they make 150 a year. We sold thousands of workmen's dinner baskets. After the war men took to haversacks."

Many American towns have taken their names from English places. There are 13 Bristol, 13 Oxford, 9 Plymouth, 7 Yorks, 7 Baths, and 6 Cambridges.

False carding is a term used by card players, and means the playing of a card meant to deceive the opponents as to the players' holding that suit.

New German bar fixtures handle beer through glass tubing, entirely eliminating the tin tubing hitherto used.

# The SNAPSHOT GUILD

DARING VIEWPOINTS

The eye looks up from below; why not the camera?

Consider the worm and his viewpoint—he's in on the ground floor. Viewpoint means much, and is an important factor in picture making. It has much to do with the perspective we get in pictures. If the perspective is not pleasing to the eye it will not be pleasing in the picture, and if the effect as seen from the viewpoint of the camera lens is odd or startling it will be recorded just so in the picture.

While distortion is to be avoided in the truly artistic photograph, it is possible to obtain many interesting shots from unusual points of view, even though the perspective be a bit violent. Expert photographers are to-day seeking and finding new angles from which to make their pictures, and for the most part the results are pleasing as well as attractive and unusual. Many amateurs are also finding a new interest in picture making from this effort to get something different. They, too, are "shooting" from positions that are daring and new.

May a worm look at a golf ball? A worm's-eye-view picture like the one above is dramatic and unusual

wholly because of the position from which it is taken. To get a similar picture the camera should be held about eight inches from the ground with the golf ball far enough away to assure good focus. A very small lens opening should be used and the exposure timed accordingly. This, after all, is a faithful rendering of the perspective that the eye sees from this lens viewpoint. Similarly with the shot of the men and the derrick atop the new building.

Try a number of worm's-eye views, some bird's-eye views (even a slight elevation will give the latter effect) and, shall we say, some cross-eyed views or snaps from odd angles. Many of them probably will be of no value, until you have been taught by experience to see the most effective combination of angle and subject for a given picture. Doubtless the most of them will be criticized as crazy-looking, but, after all, what does it matter? The answer is that you were after something uncommon, startling, weird or fantastic, and you got it. You will find experiments in this sort of picture taking of fascinating interest.

JOHN VAN GUILDER.

## Testing New Wheat

### Rust Resistant Varieties Will Be Sown This Season

Most promising strains of rust resistant wheats will be multiplied at western experimental farms during the coming growing season, it was announced by the associate grain committee of the national research council.

Members of the committee from eastern and western points were in attendance at the committee meetings in Winnipeg studying reports compiled on last year's surveys of the milling and baking qualities of the rust resistant strains.

Among the most promising strains selected for multiplication this year is Thatcher, an imported variety which has been obtained by a large number of farmers for growing this year. A committee report termed Thatcher "a highly desirable variety."

## Takes Out The Romance

From the sabbath of New England comes the news that progress has made its way in the maple groves and the sap is now gathered by pipe lines, not in sap buckets. Sugaring-off will soon be a dull and prosaic process not worthy of the attention of a small boy or little girl.

## The Wedded State

### Fewer Married Persons Are Subject To Mental Ills

Two scientists offered results of a study they interpreted as indicating the ranks of married persons include fewer mentally ill individuals than are found in the single, divorced and widow-widower classifications.

Dr. James Page of Columbia University and Dr. Carney Landis of the New York Psychiatric Institute presented their findings at a meeting of the New York branch of the American Psychological Association.

They said, however, that "marriage is no vaccine against mental disease."

Analysis of records of admissions from 1920 to 1934 at New York mental hospitals, in Massachusetts from 1929 to 1931, and in the entire United States for 1922, they said, disclosed these ratios:

Four times more divorced persons were insane patients than married persons.

Three times as many single persons were listed, compared to married ones.

Widows and widowers numbered double the married group.

Every day of its life, a hummingbird eats four times its weight in food.

## Cutwork Makes Linens Alluring

Household Arts by Alice Brooks

Here is Cutwork Without Bars

## PATTERN 5490

"Where does Mary get such LOVELY linens?" her friends all ask. If they but knew, Mary embroiders her own tea cloths, napkins, dresser scarfs and sets this easy, Alice Brooks' way. You, too, will find this lovely cutwork design the richest—and easiest—you've ever embroidered, for it has no bars, so works up quickly. Use a thread that matches or contrasts as Mary!

In pattern 5490 you will find a transfer pattern of two and two reverse corners 10 x 12 inches and four motifs 3 1/2 x 3 1/2 inches; instructions for cut-work; illustrations of all stitches needed; material requirements; color suggestions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

# Garden Soil Is Sterilized And Freed Of Weeds By The Use Of Electricity

## Macadamized Roads

### Were Named After John McAdam, Pioneer Road Builder

The civilized world has become familiar with "macadamized" roads, but it is doubtful if many of the millions who use them know the origin of the term. The British Institution of Municipal and County Engineers are taking active steps to commemorate the centenary of the death of that pioneer of roadmaking, John Loudon McAdam, which occurred at Moffat, England, on November 26, 1836.

McAdam was born in 1756, his father being a local landowner and banker in Ayr. At the age of fourteen he joined an uncle in business in New York, and did not return to Scotland until 1783. Thereafter for fifteen years he served as Deputy Lieutenant for the County of Ayr, and devoted much attention to the improvement of the local roads.

Subsequently he removed to Falmouth, where he was concerned in the victualling of the navy, though he also made a hobby of studying road conditions in that part of England. In 1816 he was appointed surveyor of the Bristol Turnpike Trust, and a year after demonstrated his system of road construction in London. This system was based upon the principle that, with proper drainage, broken stone of suitable size can be laid on the natural subsoil, thus eliminating the expensive stone-paved foundation that had previously been considered necessary.

Toronto Mail and Empire.

## Plenty To Choose From

### Many Suggestions For King George Memorial Have Been Received

Nearly 100 suggestions for the form of the national memorial to King George have been received by Sir Percy Vincent. Many of them are accompanied by drawings, some well executed, others evidently the work of amateurs. They include the following:

A statue of King George attired as an admiral "steering the ship of state through the troubled waters of his reign."

A statue of King George on the summit of a column "at least 100 feet higher than any existing building in the British Empire."

A many-storeyed concrete tower in Hyde park, the ground level to be a motor garage, the first floor a national theatre, the next a cinema, and the highest an observatory.

The lord mayors of Sheffield and Birmingham and the mayors of four Derbyshire boroughs are being invited by the mayor of Derby, Alderman E. Clark, to support a proposal that Dovedale be acquired for the nation as a memorial to the late king.

## Gifted With Fine Voices

### Pleasure To Listen To Members Of Royal Family

References made by Wickham Steed to King Edward the Seventh's wonderful voice prompted numerous discussions afterwards on the subject of Royal voices. Wickham Steed declared that he had heard King Edward's "big voice" carry 300 yards against a wind. Guests discussed King George's voice, the most famous in the world, and regarded as ideal by the broadcasting authorities. King Edward the Eighth is also gifted with the family voice, clear and carrying, says the London Daily Telegraph. Other fine royal voices are those of Queen Mary, very deep and dignified, the Duchess of York, clear and silvery, and the Duchess of Kent, deep and of such fine expression that it is a pleasure to listen to it.

## Sun Spots And Wet Weather

Floods that have swept the eastern part of North America this spring are "definitely correlated" with sun spots "and we may expect damp, rainy weather for the next four or five years because these spots are fast reaching a maximum intensity," Dr. Clyde Fisher, director of the Hayden Planetarium and fellow of the Royal Astronomical Society, said in a lecture.

It is generally believed that the earliest forms of life on earth appeared in the sea.

Electricity does almost everything in the home now except turn itself off when it is not needed.

Soil permanently sterilized—freed of weed seed, destructive insects, bacteria, fungi and plant diseases—by automatically controlled electric cookers.

Vegetables and flowers grown of season in soil ideally heated by electrical resistance cables and ers blooming in midwinter, result of artificial lighting.

Delicate seed made to face soil ridged of harm, and fungi, tree borers and destroyed by a new "soft" and vegetables and flowers grow winter on electric griddles.

Bothersome insects, such as mosquitos and codling moths, destroyed by light waves too small for the eye to detect, electric lamps which destroy mold and decay bacteria, and kill injurious bacteria, water, and green vegetables, food or animal feeds grown a few hours inside metal can without soil and without sunlight.

These are some of to-day's to-morrow's headlines in the march of science and mechanics into farms fields and home gardens, writes Charles Morrow Wilson in "Popular Mechanics."

Most soil teems with enemies to plants and man, weed seed, soil hibernating parasites and fungi. For centuries people have striven to sterilize soils and fight these hosts of unwelcome guests. The primitive defense has been to wait until fall to burn off dead leaves and stalks. More recently there have been attempts to purify the soil with chemicals. But few chemicals are effective in cold soils and sometimes the residues prove harmful.

Some progressive farmers, gardeners and florists are trying to sterilize their soil with electrical heat. They find that heating the soil to 180 degrees for five or six hours not only kills soil bacteria and insect life, but virtually every variety of weed seed, converts unavailable forms of soil nitrogen into available plant foods and develops great quantities of ammonia. This changes to nitrate, which results in more rapid plant growth.

The commercial soil sterilizer consists of a box with one cubic yard capacity, built of eighth-inch boiler plate and provided with a top for loading and a bottom dump for emptying the soil after it has been "cooked." A home-made wooden box properly wired might serve as well. Heat is furnished by fifteen electric heating elements carrying a connected load of five kilowatts placed to give even heat throughout the box and allow free space for removing soil. Elements are connected in upper and lower circuits to allow sterilization of one-half cubic yard. The cost of sterilizing a cubic yard of soil for a period of six hours at three cents a kilowatt hour is approximately \$1. A cubic yard of fertile soil will fill about 2,000 small flower pots, and the saving in weeding alone more than repays sterilization costs.

Winter vegetables such as beets, lettuce, turnips and celery grow well in soil temperatures of from 50 to 60 degrees. "Warm weather" vegetables require a soil temperature of about 70 degrees for best growth.

One gardener has installed a "warming griddle" for starting early peppers, tomatoes, cabbage and various other garden vegetables and flowers for transplanting. He built the griddle on a bench in a corner of his greenhouse, covered the top of the bench with lead-sheathed wire cable made for resistance heating and placed 2x4-inch boards between the cables to protect them from the weight of soil boxes. Within three weeks he produced sturdy plants for transplanting.

Electricity is taking new roles in the above-ground propagation of plants. Dr. Samuel G. Hibben, director of applied lighting for the Westinghouse Company is developing a means of sterilizing soils with a short-wave or soft X-ray radiation capable of penetrating the soil several inches. When the device is fully developed it is possible the soil of fields, gardens and flower beds can be freed of harmful insects, bacteria, larvae and fungi by use of a portable outfit. The soft X-ray has proved sure death to various animal organisms such as insects beneath the bark of a tree and termites in timber.

ABBOTSFORD

Harold Martin, who has resided in the district for seven years, left last week for Qualicum Beach, where he will take charge of an estate. Mr. Martin, who has been consistently prominent in various community activities, and presided for several terms over the Peardonville Live Y's, met with a serious accident one year ago suffering a compound fracture of his hip. He was invalided from hospital recently, and is now resuming work in a new locality upon the Edwards estate at Parksville, V.I.

Friends of Fr. D. O'Carroll, who has been at Grand Forks for some time, will be glad to hear that he is again in charge of the Haney parish. Born—To Mr. and Mrs. H. J. Hill-Tout, on May 3, in Chilliwack hospital a son.

Miss Frances Benedict was a member of the graduating class of nurses at St. Paul's Hospital, Vancouver, and took part in the graduating exercises held last week.

Rapidly taking its place as one of the better gardens of the district is that of Mr. and Mrs. E. Barrett, on their property just west of Abbotsford. Attractively laid out, with pleasingly blended blooms and a nice rockery, the grounds win admiring comment of passers-by.

Friends of Mrs. F. Stockwell will be pleased to learn that her son, who suffered a severe disability after leaving here to make their home in England, has recovered sufficiently to go back to his work. He injured his back in helping paint a barn on Sumas Prairie and suffered severely from the effects. He has obtained steady work in a bakery and is now able to assist his mother.

The Source of the World's Troubles

("Instructor", Gardenvale, Quebec)

"Billions of dollars are being sent annually from all parts of the world but more particularly from the British Empire, to London and Paris, mainly as interest on national debts.

This is being used to support underground propaganda and war, both of which are calculated to throw the world into confusion and chaos.

Those, into whose hands this money is flowing, prate against fascism, while they themselves practice it in its most reprehensible form.

They are sceptics, atheists and anarchists, who evidently aim at setting the best elements in civilization at each others throats—the Protestants the Catholics, and the Jews.

This move is now spreading to the United States and to Canada, evidently in the hope that the propagandists may be able to embroil the Continent of North America, notwithstanding the attempts that are being made by the government at Washington and at Ottawa to keep this continent out of it.

A good example of this propaganda was voiced by a Mr. Lovestone (no one seems to know who he is or who he speaks for) in an address delivered in Montreal a few days ago. The following is taken from a report of it in the Montreal Gazette, issue of Jan. 17th, 1936.

"We in Canada and the United States cannot escape these problems, that have Europe in a ferment," Mr. Lovestone said. "The world is one integrated economic unit." He warned his hearers against minimizing the potentialities of fascism in any country no matter how democratic it appeared on the surface. "The time to kill fascism is before it is fully born. We middle class and working people who have the most to lose in war must fight against fascism. We must mobilize opinion and we must do our bit for the Jews the Catholics, the Communists, the Socialists, all the oppressed in Germany who are undermining Hitler."

"... Economically, Europe had picked up, but it was an unhealthy artificial recovery, stimulated by huge expenditures in armaments. In Italy, discontent was widespread, but much as the people might wish the overthrow of Mussolini, the underground movement, was very feeble, and the dictator's collapse would not come tomorrow nor for many tomorrows. France, Mr. Lovestone thought, was not in immediate danger from fascism but the Croix de Feu was a powerful military organization and a real menace. Its day would likely come when France went to war with Germany. Treaties or no treaties, these two countries, must clash, he was convinced."

The only way to prevent this clash is by taking money control out of the hands of the money barons of London and Paris, who are the real trouble makers. This can be done by the establishment of NATIONAL CURRENCY. That is what President Roosevelt and the Premier King aim to do and in this they deserve the support of everyone who desires the world to return to a condition of peace and prosperity.

President Roosevelt and Premier King can do very little of themselves; but with the support of the public opinion they can do anything that is in the best interest of their respective countries.

The United States and Canada are the most complete democracies that have ever been evolved, and a democracy means just this — it means that the people are the real rulers and their supreme representative can do anything with the support of his people.

Ordinarily the masses of the people remain silent after they have cast their vote. This is not sufficient in this case. They should organize and give voice and force to their support.

The issue before Canada and the United States, during 1936, is of such importance to every man, woman and child that it deserves special attention.

A program of musical and vocal solos will be given in Poplar church on Sunday afternoon by the Pt. Grey Lifeboys (Junior Reserve Boys Brigade) with violin and flute selections. Free service. In.p

The C.C.F. local has planned a big picnic and social for May 24. In.p

Don't forget the C.C.F. dance in the Peardonville hall on May 22, old-time music, good time In.p

SCHOOL LIBRARY SERVICE TO BE EXPANDED IN VALLEY

The latest evidence of the way in which the public library in the Fraser Valley continues to forge ahead in service to the community, not being content merely to maintain an already high and well-established general standard, is the plan which is now made possible through the co-operation of the Provincial Department of Education, for increasing direct library service to the schools in the union library district.

Although specialized school library service is acknowledged to be as much a school responsibility as that of the public library, the Carnegie Demonstration Institute, and the Fraser Valley Union Library has maintained to date, entirely at the library's expense, this special service to about twenty-five schools in the valley, as a demonstration of what may be accomplished for schools all over the valley. About a year ago, with strong support from the school trustees and teachers in the valley, the library approached the government with a view to the continuance and extension of this service in the basis of cost being equally shared by the library and the Department of Education. This year the Public Schools Act was amended permitting the Council of Public Instruction to contribute toward the cost of operating school library service in any union library district in the province, and the Fraser Valley Union Library has recently been advised that the Council is ready to collaborate in this way, the grant for the next school term amounting to \$899.00.

Service to Five More Schools

As a result of this progressive co-operative action on the part of the government, not only is the continuance of the present school service assured but five additional schools will be maintained until the whole district is adequately served.

A considerable number of the schools in the valley, including most of the high schools and a number of the larger elementary schools, are, of course, well served by regular library branches, locally established, all of which have juvenile books included in their stock. The purpose, on the other hand, of the specialized school service, is to reach more particularly those schools located where the children have not so ready access to ordinary library agencies, of which there are exactly one hundred in the valley. This service gives each teacher and pupil the benefit, not merely of the books included in the local school deposit collection at any one time, but also of the whole library book-stock in the system, from which the individual collections are periodically replenished, and from which any book may be obtained by request.

tion from everyone, who is old enough in years and in intelligence to understand its significance.

## Extending power to Fraser Valley farms

Since 1929 the B.C. Electric has built 275 miles of farm power line in the Fraser Valley. Just as fast as land is being cleared and farms improved, the extension of electric service follows, making better farming methods possible. Let us tell you about our liberal line extension plan. Inquire from your nearest B.C. Electric agent.

BRITISH COLUMBIA ELECTRIC RAILWAY CO. LTD.

### ABBOTSFORD

After holding office of treasurer of the True Blue Lodge for many years Mrs. Thos. McMillan has resigned because of ill health.

Mrs. Van Lieu returned last week, having attended as a delegate to the convention of The King's Daughters in New Westminster.

Members of the St. Anne's Church young people's club held a social evening on Wednesday.

Rev. and Mrs. E. R. Scratch, Rev. R. Robertson and Mr. and Mrs. H. McNeill and Mrs. Schnare attended a District Fellowship meeting in North Vancouver on Monday, the speaker being the Rev. James Swanson of Toronto (brother-in-law of Rev. Mr. Scratch, General Superintendent of the Pacific Coastal Assemblies of Canada). He will conduct a meeting in Abbotsford on Tuesday.

Miss Mollie Thorn has secured a position at the M. S. A. hospital.

Mr. Calderwood of Regina has joined Mrs. Williams and family at their home on Gladwin road. Mr. Calderwood sustained a severe accident some time ago which necessitated him leaving his railroad work.

A "friendly" town easily draws business to itself. Outsiders are attracted to places where residents get along have a cheery word for one another, and are pleased to see some of their neighbors progressing.

The Carmenians orchestra, composed chiefly of local high school boys, are to play at the street dance, held in connection with the Chilliwack Cherry festival.

Mr. Lambin of Chilliwack, formerly of Abbotsford, was the guest of his daughter and son-in-law, Mr. and Mrs. D. Rooney on Tuesday.

April donations gratefully acknowledged by the Welfare Club.

Mrs. C. Rowles, Mr. P. Atkins, Miss F. Roberts, Miss Bessie Reyburn, Messrs. B. Scott, W. Forrest, H. Christmas, E. Herperger, C. Gentleman, Angus Fraser, T. Tessoro, B. Andrews, Mrs. Baker, Mrs. Switzer, Mrs. G. A. Smith, Mrs. J. Paton, Mrs. D. Willan, Mr. D. Bennett, Pentecostal Assembly, Miss Cruickshank.

### Oolichan Scooping

With the oolichan run in the Fraser river last week came its concomitant, a run upon the hardware stores for wire netting for the fabrication of home-made fish scoops. And on Sunday, of every two persons met, one carried a long-handled "fishing" device and a look of expectation, or, better still, a mess of the delectable little fish.

For with rising waters in the Fraser river every May comes the school of oolichan, and the ease and certainty of catching a bucketful intrigues thousands of residents of the Valley, whose angling interest remains at zero for the balance of the year.

Oolichan scooping hardly falls into the "sports" category. It is regarded disdainfully by even the common "bait" fisherman. What his hifalutin' fly-rod brother thinks of oolichan netting as a branch of Waltonism has never been put into words—if that is possible. But the fellow who takes home his pail of oolichans for the family larder does not worry about comparative ethics of angling. To him, results is what counts.

Oolichans, fried in butter, are dish for any epicure—they actually do melt in one's mouth. A firm-fleshed little fish when first caught, six to ten inches in length, they become a delicate morsel when cooked. Often they are marinated, pilchard fashion, and other families anchovy them, when they are said to be equally delicious. For generations the Indians have valued the seasonal run as a source of fat for the making of candles, dressing skins and for culinary purposes, drying the fish and utilizing the oil content.

Overflowing to waters above Vancouver harbor and down to Birch Bay early in the season, the oolichan run appears to favor the Fraser River exclusively, as the smelt run does the Columbia river. Not interfered with to any extent by commercial fishermen, the oolichans arrive at, within two or three weeks, their spawning beds, located adjacent to Harrison Bay, the Vedder, and other streams, even up to Hope. Receding waters find the spawn upon the rocks and much of it is destroyed by higher water. But Nature's percentage of propagation survival appears to be adequate, and for as long as can be remembered, the sea has returned a bountiful crop of these grey-backed little fish to Father Fraser.

The run appears to be at its best this week above Mission. Scores of net-welders were out scooping on Sunday, and everyone who devoted an hour or two to the job obtained their full allotment.

### Shingle Mill To Be Dismantled

Following the brief run on which it is now engaged the McNair shingle mill—formerly the Abbotsford Lumber Co.'s shingle mill—will be dismantled, as there is now practically no cedar left in the district. The mill has been running intermittently for the past three years, but the available local supply of bolts is now exhausted.

### LOCAL MILK SHIPMENTS TO

INDIA, CHINA, GIBRALTAR

Seasonal operation is at its height at the Pacific Milk plant, Delta, where capacity processing of 120,000 pounds of fluid milk is the daily maximum. This quantity approximates 1200 cases of condensed milk every shift.

Shipments are going out this week to Karachi, India, Gibraltar and Tientsin, China.

### GIFFORD

Miss Gertrude Menaul of Vancouver spent the week-end with her parents here.

Mr. N. O. Hawkins has returned to Seattle after an extended visit in the district.

Mrs. M. Ellison visited her sister, Mrs. Nordhouse, in Vancouver last week.

Harold Bates has secured work in Alaska, and has left for the north.

Judgment was reserved in Supreme Court today, after a four-day trial, by Mr. Justice Fisher on a claim of Mrs. Alice Kathleen Homfray of Abbotsford, and her three daughters, against a fourth daughter, Miss Rosavel Emily Homfray, of Kamloops, for a declaration that Mrs. Homfray is entitled to the rents and profits accruing from the Central Hotel, Kamloops, and to a charge against the property for moneys expended in repairs. The hotel property was part of the estate of George William Jones, who died 46 years ago. Under his will Mrs. Homfray, a daughter, was left a life interest, with the remainder among her four daughters.

A. "Slim" Webb, who is receiving treatment in Vancouver for his legs, was home for the week-end.

### CLAYBURN

Mrs. Glenn Purver has returned home from a two-weeks vacation.

Mr. Lattimer conducted service in Clayburn United church on May 3, and Mr. Donaldson of Smithers, Eng. on May 10.

Rev. Mr. Clark, who has been en-cumbent here for four years, has accepted a call to Port Moody, and has handed in his resignation here.

Fred Manders dislocated his shoulder while at work in the Pacific Milk condensary.

John Young won the rug in the contest recently held in the Village Store.

Miss Betty Seiden is home from Vancouver, where she has been taking a business course.

Mr. T. F. Seldon is again ill.

Leslie Manders, who recently obtained employment in a Vancouver Island mill, is home for a few days.

Bill Bullock has been ill with pleurisy.

Mrs. Kay, who has been ill for the past year, is in a critical condition.

Mrs. Stivins has returned home from a two-weeks vacation.

### CANARY GRASS EXPERIMENT TAKING PLACE AT NOOKSACK

An experimental plot of 12 acres of swamp land near Nooksack has been profitably cultivated to Reeds Canary grass, which produces a high grade of pasture late in summer when ordinary pastures are beginning to fail. It is most profitably seeded upon land difficult to drain, where the moisture makes for too short a growing season.

The grass is slightly less palatable than other grasses, but its fresh green growth is eaten readily by dairy cows if the pasture is clipped with a mower at intervals to prevent the grass from becoming too coarse.

Reed's Canary grass is not adapted to high ground and it need not be seeded on land which will later want reverted to general farm crops, because it has an underground root-stock similar to quack grass, and difficult to eradicate. It is useful on wet lands and does not spread uselessly to adjoining high land areas.

An expenditure of \$3000 for river-bank protection on the Fraser river near Rosedale has been authorized by federal and provincial government engineers.

What is the value of a presentable local newspaper to you, your business, your property interests... contacting your customers in the surrounding district each week—building up trade and other values between the town and a keenly-discerning district? Compare The News with the papers of other comparative towns, and ponder the question—is it good business not to be identified with this widely circulated home publication?

### Library Notes

Child Life in Other Lands  
Signs of spring are everywhere. Once again boys and girls are getting out their baseballs and footballs; squares for hop-scotch dot the school-yards; and here and there excited groups again play that good old game of "jacks". But have you ever stopped to think what games children in other parts of the world are playing? They have their schools, their games and their chores to do, but all are different from yours. How different is a day in the life of a Chinese boy or girl? Wouldn't you like to read about them, and the Dutch children, and the French, and all the others? Here are a few books that will tell you how children of other lands live, what their countries are like, how they play, some of their stories, games, and holiday celebrations. Children in grades 5 to 8 will find them very interesting to read as they study their geography at school.

Perdue, H. — Child Life in Other Lands (Japan, China).

Olcott, V. — Jean and Fanchon: children of fair France; Karl and Gretel (Germany); Klaas and Jansje (Holland).

Peck, A. M. — Wings over Holland.

Davies, E.C. — Boy in Serbia.

Headland, J. T. — Chinese Boy and Girl.

Price, O. — Middle Country (China).

Ayrton, M. C. — Child Life in Japan. Abbotsford, B.C. I. E. A.

### ABBOTSFORD

Mr. Ray Weir, who has been associated with his brother in operation of the Weir Drug Store here for several years, is leaving this week to take a position in a pharmacy in Vancouver (Granville and 40th Ave.).

Mrs. M. Nelson is a patient in the local hospital. Her husband left there last week after receiving treatment for a broken ankle.

Mr. and Mrs. R. Collins of Morris, Man., have purchased the house on Hazel street, built and first occupied by Mr. Albert Lee and family of Evan-Thomas. Mr. Collins is a retired pharmacist, and will take up residence here later in the summer.

Commissioner E. Webster is leaving the local hospital this week.

Prosperity begets prosperity, and in no less measure failure spreads failure. Small towns can be places of self-made misery and despair; or they can be places of progress and kindness. Which do you stand for?

Mr. Roberts (Roberts meat market) has purchased the D. Smith house, Lower Sumas road, into which he is moving this week. The Wm. Roberts house on Montrose avenue, which he is vacating, is being occupied by Dr. J. Lukas. The house vacated by Dr. Lukas and family, McCallum road north, is taken over by Mr. and Mrs. Arthur Bullock.

Short notice affected attendance at a meeting called last Thursday in the high-school to consider plans for the projected new gymnasium-auditorium. Another meeting is to be held tomorrow evening at 8 o'clock.

There were seven tables in play at the military whist drive held by the Eastern Star ladies on Thursday evening in the Oddfellows hall. Prize-winners were Mrs. N. Switzer, Mrs. Newcombe, Mr. N. Switzer and P. Kerr.

### FLEMING'S FOLLY

— BY —  
LAWRENCE A. KEATING

#### SYNOPSIS

The story opens with Link Fleming addressing a meeting of Boone County cattlemen, called together with the object of forming an irrigation company.

The meeting terminates, but Buzz Hamilton and his sister, Helen, Link and Kilgo stay behind and Helen asks Fleming questions about his irrigation plan. This angers Buzz, who accuses Fleming of trying to influence his sister and, as he asserts, ruin his "spread". Buzz shoots at Fleming in an uncontrollable fit of anger, but Buster Townsend, Link's foreman, is shot in the stomach, and Fleming is uninjured. Buzz is arrested and sentenced to three years' imprisonment.

Helen and Fleming form a partnership to provide irrigation for their own properties.

Fleming goes home and studies the plans drawn by Torney to learn whether they could be adapted to a smaller scheme suitable for his and Helen's land, and is satisfied it could be done. Feeling cold, he lights the fire and there is an explosion that wrecks the house, burns it and the plans and renders Link unconscious. He is rescued from the blaze by an employee.

Helen and Link ride to Rawhide for supplies and to obtain funds to carry out the dam project. They meet Roper, who greets Helen and offers to shop with her. Link goes to see the Sheriff, who tells him Buzz Hamilton has been paroled, and would arrive on the incoming stage.

Buzz Hamilton arrives back in Rawhide while Fleming and Helen are in the bank getting a loan for payment of wages for work on the dam. Roper Kilgo and Jackpot Mell meet him and he goes into the saloon with them. By the time his sister and Link come from the bank, Buzz has had several drinks. Roper has distorted the facts concerning the dam proposal to Buzz, making it appear that Link was trying to ruin him. Buzz, inflamed with liquor and anger, tries to throttle Fleming, but is thrown to the floor. Then Helen appears and tells Fleming she has been robbed of the \$800 they had obtained from the bank.

On their arrival home they were met by a couple of Link's workmen, who told Fleming that there was a strike at the dam, and that the men were afraid they would not get their wages. Link told them of the robbery and promised them their money as soon as possible. The men reluctantly returned to work.

(Now Go On With The Story)

#### CHAPTER XII.

Half an hour after the irrigation dam workers had concluded to return to their toil, Fleming emerged from the ranch house at sound of a horseman approaching. He recognized Marty Bush, the local cattle agent. Starting to meet him, Link

Bush made no reply for a moment. "I'd like to see you hold your beef another ten days, Link. I've studied the market quite some time now, and it's my judgment you'd get more money. Steers for market ain't so plentiful, but it won't be reflected in price till shipments sag under last year."

"Marty, just between us—and I wouldn't say this to another man in the county—Helen and I have to sell now. We've got to have cash, or else . . ." He gestured significantly.

"Hm. Heard about her gettin' robbed of the eight hundred." The agent cast a sidelong glance at Link. "Hit you purty hard?"

Fleming nodded. "Look here," Marty proceeded, "I want to see yuh get top price for your beef because you really need it so much. Wouldn't like to sell me a hundred acres o' that wasteland, would yuh, Link?"

The youth laid a hand on his friend's knee. "Do you believe in the dam?"

"General opinion's against it, yuh know. And I backed out once."

"I wouldn't sell you a hundred acres of solid gold, Marty, unless you really had faith in it."

There was a full minute of silence. The cattle agent's cherubic countenance wore a troubled look. Finally he said: "Link, would yuh—uh—like to borrow a couple hundred?"

Fleming was wholly surprised. He happened to know that Marty's diminutive wife, Lenore, had just recovered from a costly illness. "Thanks," he said with feeling. "I couldn't give security except my steers. I'm keepin' 'em clear because I'll need every cent they'll bring. And more, I reckon."

Bush scratched his bulbous nose. He dug inside his calfskin jacket, produced a two-inch-thick packet, and tossed it on his host's lap. "Ho hum!" he yawned, rising to stretch wearily. "There's five hundred in small bills. Thought that'd suit yuh best. I got to ride over to Pidge Somers' place an' talk beef with him. So lo—"

"Marty! Well," Link confessed, exceedingly pleased as he fingered the money, "I guess you're crazy. But—oh, shucks!" he exclaimed. "I'm shore obliged!"

"No?"—mockingly. "Link, get me Triple H an' Star Loop beef to Holmes Junction early Thursday mornin', and I'll fix you up. Want cash then too, eh? So long, Fleming's Folly! See yuh in bankruptcy court."

While he made off on his horse Link stared at the wad of bills in his hand. Grinning, he went at length to the corral where he transferred his saddle to a skittish mustang. Half an hour later he left his mount in a patch of cottonwoods that bordered the heretofore useless valley, and started on foot the remainder of the way to the irrigation dam. It was a rocky, rather steep climb even by the well-worn trail over which every pound of material had to be transported. Link walked along feeling the bulge of the money in his pocket, his step considerably lighter than it had been an hour ago.

On a rocky eminence which overlooked the dam and the broad acres to be irrigated, he saw three figures in conference. Jackpot Mell, the gunman, Roper Kilgo, and—yes, it was Gyp Vaile.

Link paused. His fingers encountered that anonymous note he had found. On quick impulse he untied his blue neckerchief. This he wrapped about his right hand as if it were injured, then strode casually forward.

"Here comes the guy that talks men into workin' for nothin'!" Kilgo greeted caustically.

Jackpot smiled his dry, reserved smile. Vaile darted beady eyes for a means of escape but Fleming blocked the only exit. He came on, a tolerant look on his tanned face.

"Wouldn't put it that way, Roper. The boys know it takes money, and that Helen and I are a little hard pressed right now."

"Yuh'll be harder pressed, an' then not pressed at all!" scoffed the thickset rancher.

He meant that bankruptcy would end the project. Link halted sideways to Mell. "Say, Jackpot, will you reach that package out of my pocket? Got my hand between a mare and a corral bar. Jest get that wad of money, will yuh?"

All three stared from Link's hand to his trousers pocket. They exchanged frowns of surprise. "Money?"

"Payroll money, five hundred bucks of it. Oh, by the way," Fleming added carelessly as he accepted the wad from Jackpot, "I wish you'd do me a favor, Roper. Write me a note to Marty Bush, since I can't do it myself with this bad paw."

Kilgo tilted back his sombrero and summoned a friendly look that was not deceiving. "Well—shore, I'll write yore note." He produced a

## Mr. CAFFEINE-NERVES . . . he does a fade-out!

WHAT DO YOU THINK, JACK... MY OLD SCHOOL CHUM, ALICE, HAS COME TO PAY US A VISIT!

THERE GOES YOUR PEACE AND QUIET! WHAT IS THIS ANYWAY... A HOTEL?

WHAT—AGAIN? SHE JUST LEFT HERE SIX MONTHS AGO!

HELLO, THERE JACK... HOW HAVE YOU BEEN?

HIST! BE AS RUDE TO HER AS YOU CAN... THAT'S A GOOD WAY TO GET HER TO LEAVE!

WELL... I DIDN'T EXPECT TO SEE YOU AGAIN SO SOON!

SAY... I'LL DRINK ANYTHING IF YOU TWO WILL JUST LEAVE ME ALONE!

CURSES! THESE WOMEN HAVE SPOILED MY GAME! I CAN'T LIVE IN THE SAME HOUSE WITH POSTUM!

YOU CAN SEE HOW IRRITABLE JACK HAS BECOME. THE POOR BOY DOESN'T SLEEP WELL, AND HAS HEADACHES AND INDIGESTION.

SOUNDS LIKE CAFFEINE-NERVES! CAN YOU GET HIM TO GIVE UP TEA AND COFFEE AND SWITCH TO POSTUM INSTEAD?

BUT, JACK... YOU REALLY SHOULD TRY POSTUM. IF I GET SOME WILL YOU DRINK IT FOR AT LEAST 30 DAYS?

THIS POSTUM SURE TASTES DELICIOUS! AND WHAT A GOOD NIGHT'S SLEEP I HAD LAST NIGHT! I TELL YOU, DEAR, I CERTAINLY AM FEELING GREAT LATELY!

NOW AREN'T YOU GLAD YOU SWITCHED TO POSTUM? YOU'VE BEEN A DIFFERENT MAN EVER SINCE!

30 DAYS LATER

IT IS TRUE that many people can drink tea and coffee without ill effects. But there are thousands of other people who cannot. Without realizing it, you may be one of these.

The caffeine found in both tea and coffee may be working night and day to rob you of sleep, upset your digestion, or undermine your nerves.

If you suspect that tea and coffee disagree with you... switch to Postum for 30 days. It is simply whole wheat and bran, roasted and slightly sweetened.

It is a delicious drink—and contains nothing that can possibly harm you. It is very easy to prepare... and costs less than one-half cent a cup.

**FREE**—Let us send you your first week's supply of POSTUM—Free! Write for it to Consumer Service Dept. 101, General Foods, Limited, Cobourg, Ontario. P-36

#### Returns To Ottawa

##### Dominion Carillonneur Has Studied Fifteen Months In Europe

The bells that ring out from the memorial tower, and play to work hustling members of parliament and dignified Senators, are again under the direction of Percival Price, Dominion carillonneur. He has returned to Ottawa from a 15-months sojourn in Europe, where he used the Pulitzer prize granted him for his "Symphony of the St. Lawrence" for further study and research of music.

High up in an office nestled like an eyrie in the tower, Mr. Price told of research in medieval city archives for ancient music, of ancient monastery chimes modern monks had forgotten how to play; of the beauty of opera in Warsaw and of the interest expressed in Canada's carillon on Parliament Hill.

So interested are many musicians, preparations are underway for an international congress of carillonneurs in Ottawa this summer. English, French and Belgian authorities intend to send representatives.

During most of his time in Europe, Mr. Price studied with Weingartner in Vienna. He spent six weeks in Poland, visited Rome and found interesting music in Belgium in the Brussels archives belonging to a carillonneur of 1648. Equally usable clavichord music was found in the Bodleian library in Oxford.

#### Reduce Relief Lists

##### Tourist Trade Expected To Give More Employment To Women

A statement issued by the Dominion tourist bureau that the coming season is expected to be one of the most successful since the boom years prior to 1929, foretells a great reduction in the number of Canadian women on relief lists.

Out of more than 80,000 employable women on relief, according to statistics presented by Labor Minister Rogers in the House of Commons during a speech on the proposed national employment commission, nearly half come under the heading of domestic, hotel, restaurant and similar occupations. The tourist bureau believes many women under these headings will be re-employed when the tourist season gets underway.

Gold output of the Transvaal in Africa last year was 10,776,700 ounces.

Social tact is making your company feel at home, even though you wish they were.

#### Little Helps For This Week

Seekest thou great things for thyself? Seek them not. Jeremiah 14:5.

I would not have the restless will That hurries to and fro, Seeking for some great thing to do, Or some great thing to know; I would be treated as a child, And guided where I go.

Be little and then you will be content with little, be not otherwise or over eager in your own willing or desiring, and by degrees come to the knowledge of your Guide who will lead you step by step in the path of life, and teach you to follow. Be still and wait for light and strength. Sink into the sweet and blessed littleness where you live by grace alone. Contemplate with delight the holiness and goodness of God, which you do not find in yourself. How good it is to be nothing when God is all.

#### A Suitable Reward

"A three-hapenny stamp, please," said the old lady to the assistant in the post office. "And, by the way, haven't I seen you somewhere before?"

"Yes," said the assistant. "I was the man who rescued you when you fell into the river last summer at Richmond."

"Well, well," exclaimed the old lady, "in that case, I'll have twelve three-hapenny stamps, six penny ones, and a postal order for five shillings."

Of the 285,147 motor vehicles tested by Connecticut's official inspection system last year, 151,991, or 53 per cent, failed to pass.

## BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better—be better, if your kidneys are functioning properly.

ABBOTSFORD

Matron Archibald welcomed 60 visitors at the M.S.A. Hospital yesterday, which was observed throughout the continent as "hospital day". The modern facilities and neat order of the institution were favorably regarded by the visitors, most of whom were

ladies. Conversation and tea service added a pleasant social touch. Mr. E. A. Hunt opened up his fine new store this week. H. Ralston is receiving treatment to his leg, which was injured while playing in a football game several weeks ago. Medeline DesMazes has recovered

from an attack of pleurisy. R. Topper and H. G. Finch will be speakers at Trinity United church on Sunday next. Carmeniana orchestra held their last Saturday night dance of the season in the Orange hall last week. Master Douglas Thorn of Vancouver was the guest of Murray Ralston over the week-end.

## SPORT SIFTINGS

Support the "Pee-Wee" Box! :

Although the older players are not pursuing the sport with their former enthusiasm, the younger lads of the district are taking their lacrosse with great gusto, and some adept handlers of the gutted stick are being developed.

A "pee-wee" league has been formed between public school pupils of Abbotsford, Huntingdon, Matsqui and Whatcom road, and games will be played each Monday and Wednesday afternoon at the box on the Jubilee grounds.

To foster the sport, Jim Roberts has donated a handsome silver cup, which will be presented to the winning team in the league, while the most valuable player will receive a silver medal, which has been donated by Teddy Barrett.

The beginners of today are the players of tomorrow, and these youngsters should be given every encouragement to play this virile game.

Following is the schedule for the next two weeks: Wed. May 13; Matsqui vs. Whatcom; Mon. May 18; Whatcom vs. Huntingdon; Wed. May 20; Matsqui vs. Abbotsford; Wed. May 27; Huntingdon vs. Matsqui.

First game took place on Monday afternoon and resulted in a 15-0 win for the Abbotsford lads over Huntingdon. The locals were the better stickhandlers and have a very aggressive forward line. Starring were Jimmy Calvert, who got seven goals, and Walter Ross, who got two goals and four assists.

First softball league tilt of the season took place on Thursday evening on Jubilee grounds between the two Abbotsford teams. Game resulted in a win, 5-4 for the Legionnaires, who came from behind, to win in the last innings.

Tuesday night softball games:—It seems that Matsqui are going to be the team to beat this season. Pounding out a barrage of mighty drives, they pinned back the ears of the Legion squad, winding up at the long end of an 11-1 score; Daly's lads beat the newly-entered Sumas team by a score of 15-8.

Members of the Abbotsford bowling club are working hard these evenings erecting a water tower close to the green, to be used to obtain pressure for sprinkling purposes. The bowling green seems to be taking very good shape, with a nice coating of grass, and presenting an absolutely level surface. It is hoped to commence bowling in July.
